

Turn Long-Form Video Into Clear, Compelling Stories

A Transcript-Driven Video Story Builder

You're sitting on great content.

Your team is already creating valuable long-form content. The challenge is turning that footage into clear, cohesive short videos ready to share.

Now turn it into great stories.

LuciHub Story Builder™ combines AI-powered content tagging, full transcription, and intelligent story curation to dramatically reduce the time it takes to produce short-form video content.

TOP USE CASES

From Interview to **Impact**

Teams using LuciHub Story Builder™ publish 5X more content without adding head count.

Thought Leadership Clips

Turn long-form interviews into short, compelling insights your audience actually watches.

Customer Story Creation

Shape raw testimonial interviews into polished stories ready to publish across channels.

Podcast Story Clips

Extract the most compelling moments from podcast episodes into shareable, branded story segments.

CORE CAPABILITIES

Everything You Need to Ship Stories Faster

● Automatic Content Tagging

Every interview and podcast is automatically transcribed and tagged on upload - making content instantly story-ready.

● AI Storyteller Agents

AI agents curate compelling stories by pulling from different moments across the video - not just sequential clips.

● Reorder and Restructure

Rearrange segments within any story. Change the narrative arc. Full editorial control at every step.

● Full Sentence-Level Transcription

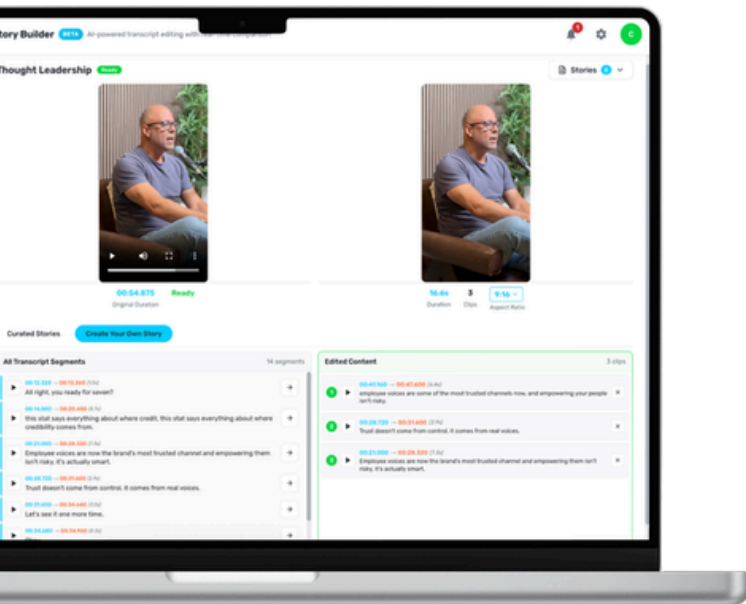

Get a complete, accurate sentence-by-sentence transcript of every recording - the foundation for smarter curation.

● Manual Story Creation

Prefer full control? Select specific transcript segments to build your own custom story structure from scratch.

● Cutdown Creation

Quickly produce short-form cutdowns in different formats - ready for internal distribution and social channels.
